SUMMARY

An enthusiastic undergraduate specializing in Information Technology, passionate about creating innovative digital solutions. Strong interest in full-stack web development, with a collaborative mindset and a continuous drive to learn emerging technologies. Dedicated to combining creativity with technical knowledge to deliver secure, efficient, and impactful results using the MERN stack.

EDUCATION

SLIIT (Sri Lanka Institute of Information Technology)

Feb 2023 – Nov 2026

BSc (Hons) in Information Technology Specialize in Information Technology

Malabe, Sri Lanka

TECHNICAL PROJECTS

Lak Travelers | [GitHub](#) | [Live Project](#)

Dec 2025 – Present

Technologies: React.js, Node.js, Express.js, MongoDB, Redux Toolkit, Tailwind CSS

- Developed a full-stack tourism platform with Role-Based Access Control (RBAC) for Travelers, Vendors, and Admins.
- Implemented a robust multi-factor authentication system using JWT and Email OTP verification for account security.
- Integrated Lak Assistant AI to provide custom travel support and enhanced user interaction.
- Designed a professional dashboard featuring Base64-encoded image uploads and real-time state synchronization.
- Optimized backend middleware to handle high-volume data payloads (10MB+) for multimedia content management.

MyHomeStock | [GitHub Repository](#)

Jun 2025 – Present

Technologies: Node.js, Express, MongoDB, JavaScript

- Built a smart home-inventory management application enabling users to track items and generate automated alerts.
- Implemented secure user authentication and personalized inventory spaces for multiple users.
- Designed modular API routes in Express to handle complex CRUD operations for item tracking and reporting.
- Developed intelligent features for purchase suggestions and out-of-stock notifications based on usage patterns.

Dish-Craft | [GitHub Repository](#)

Jun 2025 – Present

Technologies: React, Node.js, Express.js, MongoDB, Tailwind CSS

- Built a recipe management web application for creating, browsing, and sharing cooking recipes online.
- Developed dynamic frontend interfaces with React for smooth navigation and a responsive user experience.
- Integrated MongoDB as a flexible NoSQL database to efficiently store recipe data, ingredients, and user profiles.

Salon Diamond Management System | [GitHub Repository](#)

Jun 2025 – Present

Technologies: Node.js, Express.js, EJS, SQL, HTML, CSS

- Developed a management system to handle salon appointments, clients, and services.
- Implemented server-side rendering with EJS for dynamic page generation and interactive workflows.
- Designed and maintained a relational SQL database schema for structured data storage and management.

SKILLS

Frontend Development: React, JavaScript (ES6+), Tailwind CSS, Redux Toolkit, HTML5, CSS3

Backend Development: Node.js, Express.js, RESTful APIs, JWT Authentication, Nodemailer

Database Management: MongoDB (Mongoose), MySQL, SQL

Tools & Others: Git, GitHub, Postman, VS Code, Figma, Axios

Soft Skills: Team Leadership, Teamwork & Collaboration, Problem-Solving, Time Management
