SUMMARY

An enthusiastic IT undergraduate at SLIIT specializing in architecting secure and scalable full-stack applications. Expert in the MERN stack, with hands-on experience integrating AI-driven support and multi-factor authentication. Dedicated to technical excellence and building high-performance professional digital experiences.

EDUCATION

Sri Lanka Institute of Information Technology (SLIIT)

BSc (Hons) in Information Technology Specializing in IT

Feb 2023 – Nov 2026

Malabe, Sri Lanka

TECHNICAL PROJECTS

Lak Travelers — Full-stack Tourism Platform

Dec 2025 – Present

React.js, Node.js, Express, MongoDB, Redux Toolkit, Tailwind CSS

[\[GitHub\]](#) [\[Live\]](#)

- Developed a robust RBAC system for Travelers, Vendors, and Admins to manage tourism assets efficiently.
- Implemented JWT-based sessions and Nodemailer Email OTP verification for enterprise-grade security.
- Integrated "Lak Assistant AI" providing real-time travel support and automated response systems.
- Optimized backend for 10MB+ multimedia payloads with custom middleware and real-time state synchronization.

MyHomeStock — Smart Inventory Management

Jun 2025 – Present

Node.js, Express, MongoDB, JavaScript (ES6+)

[\[GitHub\]](#)

- Engineered an automated inventory system with predictive low-stock alerts and automated shopping lists.
- Built modular RESTful APIs for complex CRUD operations and secure multi-user data isolation.
- Designed a responsive dashboard for real-time inventory visualization and management.

Dish-Craft — Recipe Management System

Jun 2025 – Present

React, Node.js, Express.js, MongoDB, Tailwind CSS

[\[GitHub\]](#)

- Created a community recipe platform with dynamic React components and high-speed ingredient filtering.
- Optimized NoSQL database queries to improve search performance and recipe indexing speed.

Salon Diamond Management System

Jun 2025 – Present

Node.js, Express.js, EJS, SQL, HTML5, CSS3

[\[GitHub\]](#)

- Developed an appointment ecosystem with server-side rendered dynamic pages using EJS.
- Maintained a relational SQL schema to manage client profiles and complex scheduling workflows.

TECHNICAL SKILLS

- **Frontend Stack:** React.js, JavaScript (ES6+), Redux Toolkit, Tailwind CSS, HTML5, CSS3
- **Backend Stack:** Node.js, Express.js, REST APIs, JWT, Email OTP Auth (Nodemailer)
- **Database:** MongoDB (Mongoose), MySQL, Relational Database Schema Design
- **Development Tools:** Git, GitHub, Postman, VS Code, Figma, Axios, Vercel
- **Professional:** Team Leadership, Agile Workflow, Problem-Solving, Time Management
